

Simple HTML Calculator

![Calculator](https://cdn3d.iconsout.com/3d/premium/thumb/calculator-3671700-3061901.png)

Description

This is a straightforward HTML calculator that allows you to perform basic arithmetic operations. It features a clean and user-friendly design with an easy-to-use interface. You can perform addition, subtraction, multiplication, and division operations with this calculator.

Features

- Addition, subtraction, multiplication, and division operations.
- A clear button (C) to reset the input.
- Error handling in case of invalid input.
- Responsive design.

Demo

You can try out a live demo of this calculator
[here](#insert-link-to-demo-if-available).

Usage

1. Clone or download this repository to your local machine.
2. Open the `index.html` file in a web browser to use the calculator.
3. To perform calculations, click the buttons for numbers (0-9) and operators (+, -, *, /). The input will be displayed in the text area.
4. Use the "=" button to calculate the result. The result will be displayed in the text area as well.
5. To clear the input and start a new calculation, click the "C" button.
6. Be cautious with your input to avoid errors. If an invalid calculation is attempted, the calculator will display "Error."
7. Customize the design and layout by modifying the CSS styles in the `

Enjoy using this simple HTML calculator for your calculations!
