Survey Form HTML Template

This is a simple HTML survey form template that you can use as a starting point for creating your own survey or data collection forms. It includes basic form fields and form validation using JavaScript.

Table of Contents

- [Demo](#demo)
- [Features](#features)
- [Usage](#usage)
- [License](#license)

Demo

You can see a live demo of this survey form template [here](#link-to-your-demo-if-available).

Features

- Simple and clean design.
- Form validation to ensure required fields are filled.
- Displays a popup with the submitted form data.
- Reset button to clear the form.

Usage

1. Clone or download this repository to your local machine.

2. Open the `index.html` file in a web browser to see the form template in action.

3. You can use this template as a starting point for your own survey or data collection forms. To customize it, you can make changes to the HTML and CSS as needed.

4. If you want to add more countries to the dropdown, simply extend the `<select>` element under the "Country" field.

5. You can also modify the JavaScript function `validateForm()` to add or change validation rules as per your requirements.

License

This project is licensed under the MIT License - see the LICENSE file for details.

Feel free to customize and extend this README as per your project's requirements. Make sure to replace `#link-to-your-demo-if-available` with the actual link to your live demo if you have one. Additionally, if you've used any third-party libraries or resources, consider adding a "Credits" section to attribute them.
